

ROOM-BY-ROOM

# Reed, candle, or wax melt? *Pick right.*

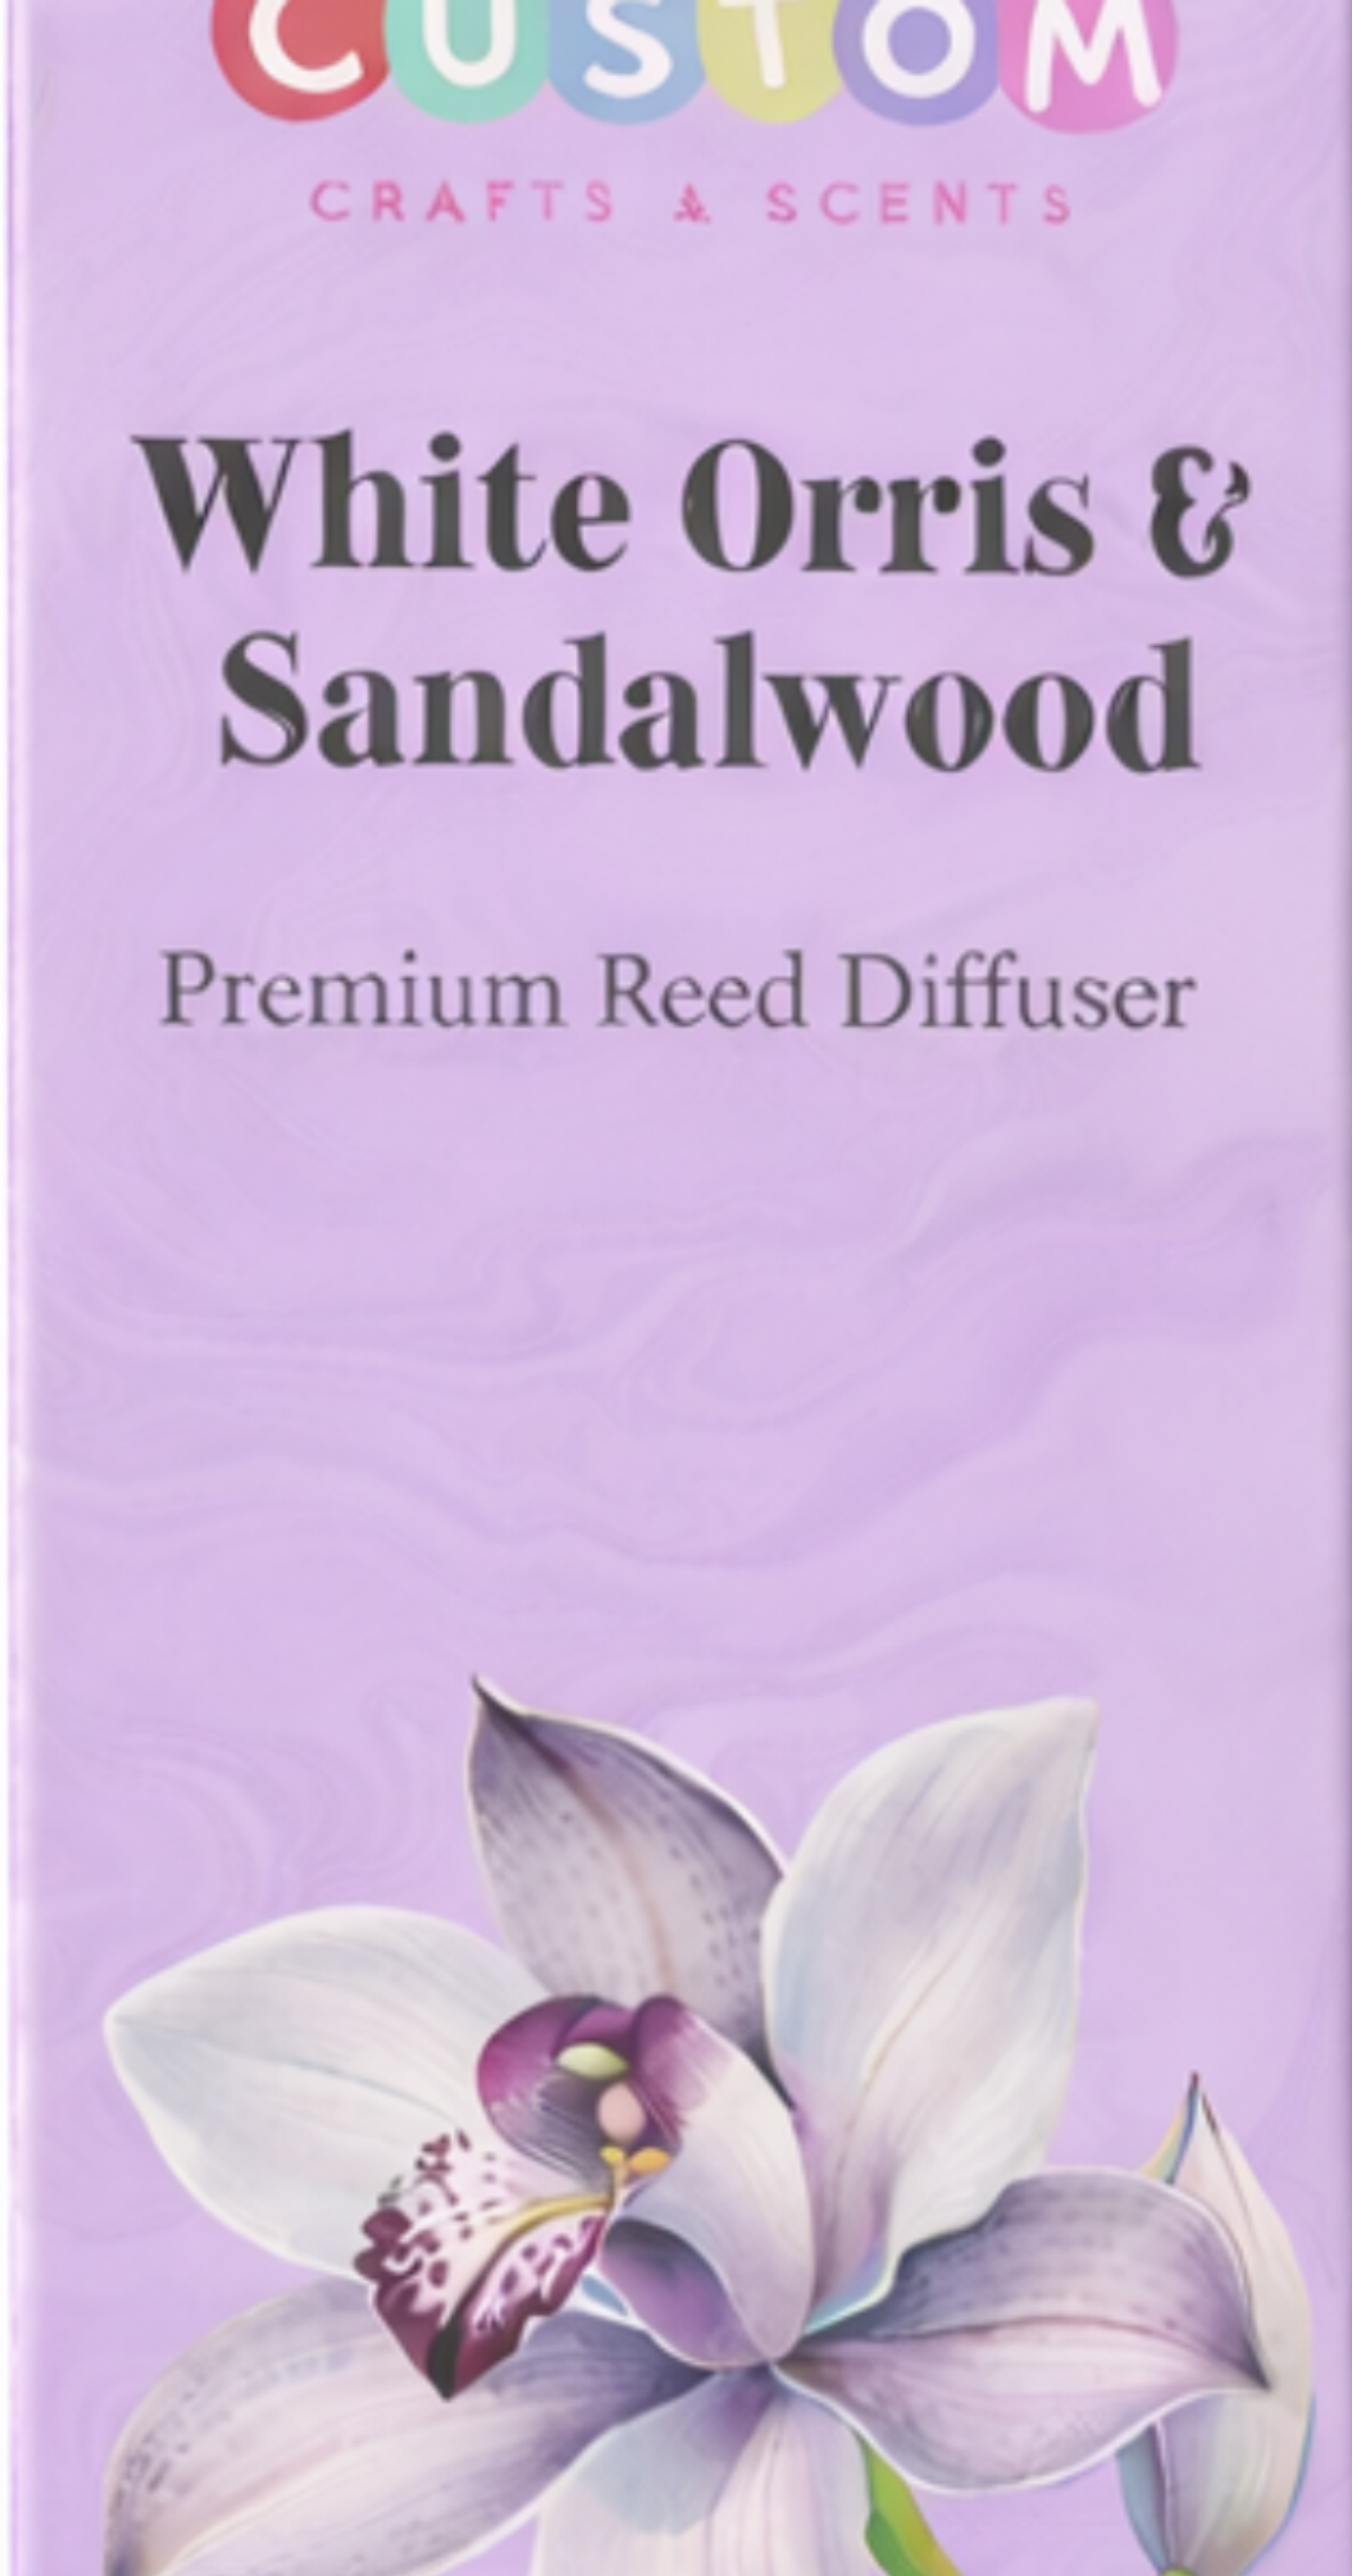

Same goal. Three completely different jobs. Here's how to choose.

**Custom Crafts & Scents**

NORTHPOINT MALL · ALPHARETTA, GA

SWIPE →

**01**

## **Reed → *always-on rooms***

Bathrooms, entryways, and any room you don't sit in long. Reed diffuses 24/7 with zero plug, zero flame. Flip the sticks once a week and a single bottle scents for 3–4 months.

*02*

## **Wax melt →** *living rooms*

You control the volume — one cube for soft, two for full. Stronger throw than a candle without the flame. Best for spaces where you want the scent to actually announce itself when guests walk in.

03

**Candle** → *intentional moments*

Dinner, baths, slow Sunday mornings. The flame is half the experience. Light it 30 minutes before company arrives — let the scent settle into the room before they do.

**04**

## **WallScents → *kid-safe everywhere***

Plug-in wall warmer with no open flame. Perfect for nurseries, hallways, and bathrooms with toddlers. Swap the oil refill in 30 seconds when you want a new mood.

NEED HELP DECIDING?

**Tell us your *room*, we'll  
pick**

Comment **ROOM** and we'll DM your personal scent stack.
